Main Specifications

Main Specifications

Forming Area	MIN600mm (Width)×600mm (Feed) MAX1050mm (Width)×1170mm (Feed)
Material Width	MIN640mm – MAX1060mm
Material Thickness	MIN0.2mm – MAX1.5mm
Forming Depth	MAX150mm (both top & bottom)
Compacting Pressure	45TON
Open Height	Top Table: MIN345mm – MAX480mm Bottom Table: MIN345mm – MAX480mm
Shut Height	

	Top Table: MIN115mm – MAX250mm Bottom Table: MIN115mm – MAX250mm
Table Stroke	Upper Part 230mm; Lower Part 230mm
Forming Method	Compressed Air, Vacuum Forming
Raw Materials	OPS , HIPS , PP , A-PET . etc.

Features

- Prevention of chip powder being made by using a chain clip system for the sheet feed
- Equipped with quick heater and temperature correcting function for stable forming

Options

- Sizing Cutter Device (circular running-type)
- Vacuum Pump
- Die Temperature Controller

Inquiries
