Main Specifications

Main Specifications

Cutting Dimensions	MIN1060mm (Width)×340mm (Feed)
Sheet Width	MIN800mm – MAX1100mm

Product Height	MAX120mm (Upward Curve) MAX60mm (Downward Curve)
Molding Depth	MAX100mm
Shut Height	MIN150mm – MAX285mm
Vertical Stroke	150mm
Pressurizing Capacity	10TON(Capacity Limitation (above bottom dead center) 3mm)
Height Adjustment	135mm
Dimensions for Top Board Punch Holes	1100mm (Width)×150mm (Feed)
Dimensions for Bottom Board Punch Holes	1080mm (Width)×360mm (Feed)
Raw Materials	OPS , HIPS , PP , A-PET . etc.

Features

High-speed, shorter setup time, high-precision, high-rigidity

Options

- Press Vertical Stroke 200mm
- Crank Phase Detection
- Carrier Bar or Die Vehicle
- Subplate
- Inbound Side-feed Roller (double drive)
- Outbound Side-feed Gate (double gate)
- Pressure System AC Servo Motor Drive
- Knockout 2 Punching Device
